

Confex members can now access a range of services to help them lower their utilities bills and reduce energy usage.

Confex has partnered with Inspired Energy plc, the UK's leading energy consultancy, working with businesses to optimise the value of every pound spent on utilities. This is achieved through a range of specialist solutions aimed at lowering bills and protecting businesses against rising energy costs and changes in legislation.

We specialise in corporate utility management but are on hand to assist businesses of all sizes in the commercial, industrial and public sectors.

Inspired Energy's market presence extends to:

- 550+ employees, headquartered in Lancashire
- 235,000 meter points under management
- Over 3,500 clients across the group
- Over 30 TWh of energy managed annually
- Over £2.5bn worth of annual energy cost (more than most energy suppliers)

Regardless of how much energy you use, our team of energy experts can provide a bespoke energy service which meets your specific needs.

Working across all utilities, including electricity, gas, water and renewables, we will relieve you of the burden of managing the many utility cost pressures confronting your business. This will leave you free to focus on running your organisation as profitably and effectively as possible.

You will be assigned your own Account Manager who will speak to you over the phone to collect the necessary information (usually only a copy of your recent bill and a Letter of Authority is required). Once received, they will discuss the appropriate options with you, investigating both procurement and energy efficiency benefits.

Green Wholesaler Awards

Inspired Energy are proud to be on board as the headline sponsor of the Confex Green Wholesaler Awards. We will be launching a brand new entry process and really look forward to working alongside the membership.

Optimising energy strategies in the bid to reach Net Zero is at the heart of what we do and we are excited to work alongside as many members/clients as possible to control costs and manage consumption.
